**Brief Description About Proposed Points:**

We decided how the interface of Home Page and Login Page will be designed. For getting more ideas and to analyse the development of Home Page and Login Page we watched some videos. If the ID and Password is stored in database and is linked to the website, Website can authenticate the Admin. For doing this process, we analysed some videos. We gathered information for how the images will be stored and displayed onto the website. We finalized the whole flow/design of our project. Contacted mentor for discussing the final design/flow of the project.
