# PROJECT WEEKLY REPORT

**Project Title:** IOPE Diaries.                          **Month Beginning:** 22 Jan to 28 Jan

**Project Group Members:**

| Roll No. | Name | Attendance |
|---|---|---|
| 2201967 | Sejal Ravindra Pawar | |
| 2201933 | Manish Shashikant Jadhav | |
| 2201929 | Shruti Sanjay Gurav | |

**Month:** January 2023.                          **Week:** [4th Week]

| Date | Discussed Points | Remarks | Sign |
|---|---|---|---|
| 22/01/2023 | Watched videos for making Homepage more attractive. | | |
| 23/01/2023 | Started to implement homepage more attractive. | | |
| 24/01/2023 | Completed homepage and start creating course section. | | |
| 28/01/2023 | Completed course section and started gathered information for Login Page. | | |

**Project overall status :**          **work is verified and completed in the 4th week of month.**

**Brief Description About Proposed Points:**

We started to working on our project, starting with homepage we watched various videos for making our Homepage more attractive. we added background image also added hover on navigation buttons. While scrolling down word we added some images of our campus as well as facilities which are available in our collage, also added light coloured hover on it. After completing homepage, we started to making 'course section' In the course section we have added courses which are available in our college. We apply hover on it for making it attractive. After completion of course section gathered information for Login page.

| 29/01/2023 | Contacted with mentor and discussed on various points | | |
| 31/01/2023 | Made changes in homepage as per mentor suggestions. | | |

**Project overall status :**       **work is verified and completed in the 5th week of month.**

**Brief Description About Proposed Points:**

We contacted with our mentor for making our homepage more attractive and discussed various points for developing website, mentor provided various suggestions as per his suggestions, we made some changes in our homepage , for our main interface we added background video ,as well as in middle of it we added title of our project which is IOPE Diaries. below of our project title we added button which is explore our events. For user to view events. which are uploaded by admin. Still we just added button but we can not create database for it so still users can not see any events. when we will create database and when admin can add data then and then only users can view events.

**Project overall status :**        **work is verified and completed in the 2nd week of month.**

**Brief Description About Proposed Points:**

We started to create About-us section. In that about us section, we have added our team member's information. It contains the images of each three team members of Team CodeHolics who have built this website. The images are aligned perfectly in the grid. We have added an hover effect which makes the About us Section more attractive. The user when drag the mouse pointer to the image of any particular team member, then an hover effect will get-up converting that particular grid into white color. When hover effect gets-up on the particular image on which user has kept the mouse pointer, all the information related to the particular team member is displayed. It contains the name of the Team Member, their post in the team, and the role assigned to them on which they have worked on to make this website.

| 17/02/2023 | Successfully connected our Log in page to Database. | | |

**Project overall status :        work is verified and completed in the 3$^{rd}$ week of month.**

**Brief Description About Proposed Points:**

      Our project has already described that the only peoples/users who can login into our website are only Admins. Users will not have any kind of Login access. Firstly, we started creating an login page. All the frontend work of creating an attractive login page interface was completed successfully. We have then created an database table in which the user id and password can be already defined which will be used by Admin. As we told before only admins can login into the website, hence for protecting the other users to create account as admin and login, we have already set an unique User id and password for the admin into the database through which only admins can login into the system using those user id and password. Hence, it protects the data and mischief activities uploading onto the website as only trusted admins (college staff) are given the access to that user id and password.

| Date | Discussed Points | Remarks | Sign |
|---|---|---|---|
| 19/02/2023 | Modified Login Page. | | |
| 24/02/2023 | Contacted with mentor and finalized MySQL as the project database language. | | |
| 25/02/2023 | Looked out for reference videos and websites for image uploading page. | | |

**Project overall status :        work is verified and completed in the 4ᵗʰ week of month.**

**Brief Description About Proposed Points:**

After the completion of Login page, came across the various more attractive login page designs.  We performed some modifications onto the login page and gave different UI for login error message. Modifications were not as of complete change in login page but changed the background of Login Page and added much attractive as well as cooler gradient image which increased the attractiveness of the Login page than it was of before. As we have to work forward for making a page where images can be uploaded to the database. Hence, for the better suggestions, we contacted to our mentor and discussed various types of languages which we can use in our project for database working. For storing data (images) as well as all the events details which will be uploaded and fetched easily, he suggested MySQL will be the better to perform coding easily, effectively, and quickly. We finally decided to use phpMyAdmin as our database. Lastly, we started looking out for references, videos for building up the image uploading page.

| 26/02/2023 | Started creating the Image Uploader Page. | | |
| 28/02/2023 | Completed the database working for Image Uploader Page. | | |

**Project overall status :         work is verified and completed in the 5<sup>th</sup> week of month**

**Brief Description About Proposed Points:**

In this project, we have to upload the images of the events conducted in our college. For that purpose, we started creation of the page from where admin can upload the event images to the database. We started the front-end for uploading images. It will contain an button which allows us to select the images which we are supposed to upload to the database. We completed the database coding and were able to upload images to the database. We used the phpMyAdmin database for uploading the images successfully. In the database, we created a data table which contained the id which will be incremented automatically, a column for storing the images with their particular image name, and a column which contained when the images were uploaded to the database. We have also restricted other file types rather than jpg, jpeg, png, heic, hfif, etc.

|---|---|---|---|
| 01/03/2023 | Completed Front-End work for Image Uploader Page for Admin. | | |
| 03/03/2023 | Made some changes in Image Uploader Page. | | |

**Project overall status :        work is verified and completed in the 1ˢᵗ week of month.**

**Brief Description About Proposed Points:**

We completed all the Front-End working of Image Uploader Page. It contains an button which allows us to select the images which we are supposed to upload to the database. When admin clicks the button file manager window is popped-up where admin can select images. Multiple selection of images is also permitted as multiple images can be uploaded at a time. It saves the time and manpower of selecting and uploading a single image only at a time. Images uploaded are fetched from the database and are successfully displayed in a proper grid. We have also restricted other file types rather than jpg, jpeg, png, heic, hfif, etc.Lastly, made some design, layout changes in Image Uploader Page. Modifications were like background, grid management, and created attractive user interface.

|---|---|---|---|
| 02/04/2023 | Created modal for uploading event data in Admin Panel. | | |
| 04/04/2023 | Created Admin Panel and fetch all data from the database.. | | |
| 07/04/2023 | Added Edit Event & Delete Event function in Admin Panel. | | |
| 08/04/2023 | Faced Errors while fetching the first data of the database, started working on it. | | |

**Project overall status : work is verified and completed in the 2nd week of month.**

**Brief Description About Proposed Points:**

After the admin logins into the website he will be granted options of uploading data. We created a modal for uploading event data in admin panel. While uploading data we provided form which contained event name, department name, event description, and a image. The data will be stored in the database and to display it in admin panel we successfully fetched data from database and displayed it. We have also added Edit Button and Delete Button. The Edit Button is used to update the particular event data which is already uploaded into the database. When an admin clicks Edit Button same modal form is popped-up with the original details which are already filled. Admin can update everything like Event Name, Department Name, Description, and also the image. After updating, the data in the database will be updated and the updated data will be fetched and displayed in the particular edited row. The delete button can simply delete the particular event. We also faced an error where the first data from the database was added in the database but was not display in the admin panel, we started working on this error.

| 09/04/2023 | Created User event section and fetched data. | | |
| 14/04/2023 | Added gradient Animation as a background of the user section | | |

**Project overall status :        work is verified and completed in the 3$^{rd}$ week of month.**

**Brief Description About Proposed Points:**

As we told before, Admin has only access to upload the data onto the website. Users can only view the uploaded data by the admin. For viewing the uploaded the data for the user we have created user section where the events data uploaded by the admin will be displayed in the form of card layout. The data is fetched from the database. Each card is arranged in the proper grid.  The event image which added will be displayed at the top of the card and the event name, department name and description will be displayed below the image. When admin uploads any events data to the database through Admin Panel, it is also fetched in the users section immediately. If any updates are done by admin, same the events will also get the updated data. Users cannot perform any activity onto the website. They are only accessible to view the event data uploaded by the admin. We created a gradient animation and added it as a background of user event section which makes the user event section looks cooler .

| 21/04/2023 | Added contact us section | | |

**Project overall status :**        **work is verified and completed in the 4th week of month.**

**Brief Description About Proposed Points:**

We have added contact section as informed by our project guide. In that we have added a map which provides location of our college. Then we have added contact form, it will be used to contact college faculty related any query by students. Students can asks their queries freely. Except Contact form we have added college contact details containing college enquiry phone number, college address and working time-days which will help students to know the exact location and working time of college in case they want to visit the college. It will be easier to users to reach out easily without any problem through phone, email or social media.  A well designed contact us page can provide students with easy access to resources and support services.

|---|---|---|---|
| 26/04/2023 | Successfully categorized events. | | |

**Project overall status :        work is verified and completed in the 5<sup>th</sup> week of month.**

**Brief Description About Proposed Points:**

We have successfully categorized events. As per our project coordinator instructed us to categorize events on their certain criteria. They asked us to categorize events in 3 criteria's which are Cultural, Technical Events, and Sports Events. Cultural events that contains Freshers, Farewell, etc., Sport events that involve physical activity and competitions, Technical events that focus on technical subjects like workshops, Tech/Non-Tech Events conducted in college. While event is uploaded it is assigned with a category. In User Section where events are displayed we have added a drop-down list which contains all three criteria's. As before all events are displayed but in case if user selects the Cultural option from drop down list, only the cultural events will be displayed, so as goes to Technical and Sports event options.
